TORIES LINE UP FOR ATTACK ON LLOYD GEORGE

Coalition and "Die Hard"
Wings Vainly Seeking Leader
Against Premier.

By DAVID M. CHURCH.
International News Service.

LONDON, Oct. 18.—Both wings of the Tory party were busy recruiting their full strength today in preparation for the struggle which will come tomorrow when the members vote whether to support the coalition government of Lloyd George or withdraw.

Austen Chamberlain, a Tory, and government spokesman in the House of Commons, has asked the party to support the premier. If the vote goes against Chamberlain's suggestion tomorrow it will be tantamount to withdrawal of the Unionists from the coalition government.

It was reported during the afternoon that the "Coalitionists"—that is, those supporting the Lloyd George ministry—were gaining strength.

Leader Hard to Get.

The Tory "die hards" are finding it difficult to get some one to lead the Lloyd George revolt. Lord Derby, former secretary of state for war, and later ambassador to France, was offered this "honor," but he refused it. Then the "die hards" tried to

GIRLS AT COLLEGE

TURN BOOTBLACKS

CHICAGO, Oct. 18.—To the ranks of the millionaire newswoman and the capitalist rag picker there was added today another paradox of industry, when Miss Elsa Ellison and Miss Constance Croonenbergh, sophomores at the University of Chicago, hung out their shingle as shoe shiners in Ida Noyes Hall, the university woman's building.

Both girls are members of the Sign of the Shille, an honorary society, but they maintain everyone should work and the law of supply and demand seems to have chosen them as polishers of shoes.

get A. Bonar Law, former chancellor of the exchequer, to lead the political uprising against the premier, but he declined.

In connection with the political warfare the interesting news came from Belfast today that Lord Carson (formerly Sir Edward Carson) plans to give up his law lordship in order to resume his political activities on the firing line. He is a Unionist and is opposed to Lloyd George on account of the latter's Irish policy.

The so-called "Northcliffe press" now controlled by Lord Rothermere, says that the political situation is veering and that Lloyd George is now willing to put off the general election until January instead of holding it the first of November.

Colonial Secretary Winston Churchill will be out of political activities for some time. His illness, which was first supposed to be inflammation of the lining of the stomach and intestines, today was diagnosed as appendicitis.

He probably will undergo an operation which will keep him from the political arena for at least a month.

'WETS' START DRIVE TO GAIN NEW CONGRESS

Headquarters Are Opened and
Campaigns Will Be Pressed
In Several States.

A nation-wide drive to secure the election of congressional candidates who are in favor of modifying the Volstead act was started in Washington today by the Association Against the Prohibition Amendment, which has headquarters in every state.

Definite plans were completed today and the campaigns already begun in the several states will be carried on without letup until election day next month.

List of Candidates.

As an indication of the efforts that will be made to secure the election of wet candidates for Congress, G. C. Hinckley, national secretary of the association, today issued a partial list of the candidates who will be actively supported by his organization.

In Maryland the association has endorsed Charles J. Butler, Republican, in the First district; Millard E. Tydings, Democrat, in the Second district; both Congressman John Phillips Hill, Republican, and his Democratic opponent, Antony J.

U.S. Envoys In Europe Gather In Berlin For Conference

By Universal Service.

BERLIN, Oct. 18.—American diplomatic representatives in Middle and Western Europe are assembling in Berlin this week for a conference called by Ambassador Houghton. They will discuss matters affecting their particular territories and decide upon a policy of closer co-operation in the discharge of diplomatic functions.

The first meeting will be held Friday. The participants, in addition to Ambassador Houghton will be Theodore Brentano, minister to Hungary; Albert Washburn, minister to Austria; Joseph Grew, minister to Switzerland; Hugh Gibson, minister to Poland; General Allen, commander of the Rhine forces; Commander Koehler, Naval attache in Poland; and W. R. Castle, chief of the State Department for Western European affairs who is now visiting the capitals under his jurisdiction.

Dimarco, in the Third district, which covers part of Baltimore; Congressman J. Charles Linthicum, Democrat, Fourth district; C. M. Roberts, Democrat, and Congressman Sydney E. Mudd, Republican, Fifth district, and Frank W. Misch, Democrat, who is seeking to unseat Congressman Fred N. Zihlman, the dry member.

Congressman J. T. Deal, of the Second district, and Congressman H. St. George Tucker, of the Tenth district, are favorites of the association in Virginia. In West Virginia the association is putting its

support behind the candidacy of B. L. Rosenbloom, Republican, of the First district.

Busy In 35 States.

The list indicates activities already under way in thirty-five States. It includes the names of 202 Senatorial and Congressional aspirants, representing large numbers in each of the two great political parties. All are regarded by the association as having taken a stand acceptable to its views. Many are now in Congress, and the re-election of these will not serve to swell the wet element in the National legislature. Mr. Hinckley figures, however, that if success attends the vigorous campaign that is being prosecuted by his organization, the ranks of the wets in Congress will be increased by seventy to seventy-five over the present number.

In some instances, the list contains the names of both Republican and Democratic candidates in a particular district. In such cases, Mr. Hinckley explained, it is the intention of the Association to maintain an impartial attitude as between such rivals, although the organization is inclined to lean to the liberal candidate already in Congress.

Anti-Saloon League Tactics.

In general, the Association has stolen a leaf from the tactics of the Anti-Saloon League in its campaign plans, and, according to its officials, confidently looks for an even greater degree of success to follow, once a "liberal" candidate is assured of vigorous and unremitting support along organized lines from the liberal element in his own Congressional district, backed up by similar support throughout the entire country.

Subject to Revision.

In making public the list of candidates today, Secretary Hinckley said: "It should be understood that this is a preliminary list, subject to revision and expansion as the campaign develops."

"It should be further distinctly understood that the association's endorsement of a candidate does not necessarily mean that he has directly advocated our platform; it does mean, however, that, for reasons satisfactory to us, we are willing to endorse him."

Syrup Pepsin Helps Nature Give Relief

Try it when a Laxative is needed and
see the wonderful results

ANY FAMILY MAY TRY IT FREE

IT is not necessary to take a violent physic for so simple an ailment as constipation. Yet many thoughtless parents give mercury in the form of calomel, and coal-tar in the form of phenol when a natural vegetable compound like Dr. Caldwell's Syrup Pepsin will do the work equally well and without danger. People should realize that mercury may salivate and in certain conditions loosen the teeth; that phenolphthalein, by whatever name known and however disguised in candy, may cause dermatitis and other skin eruptions; that salt waters and powders may concentrate the blood, dry up the skin and cause lassitude.

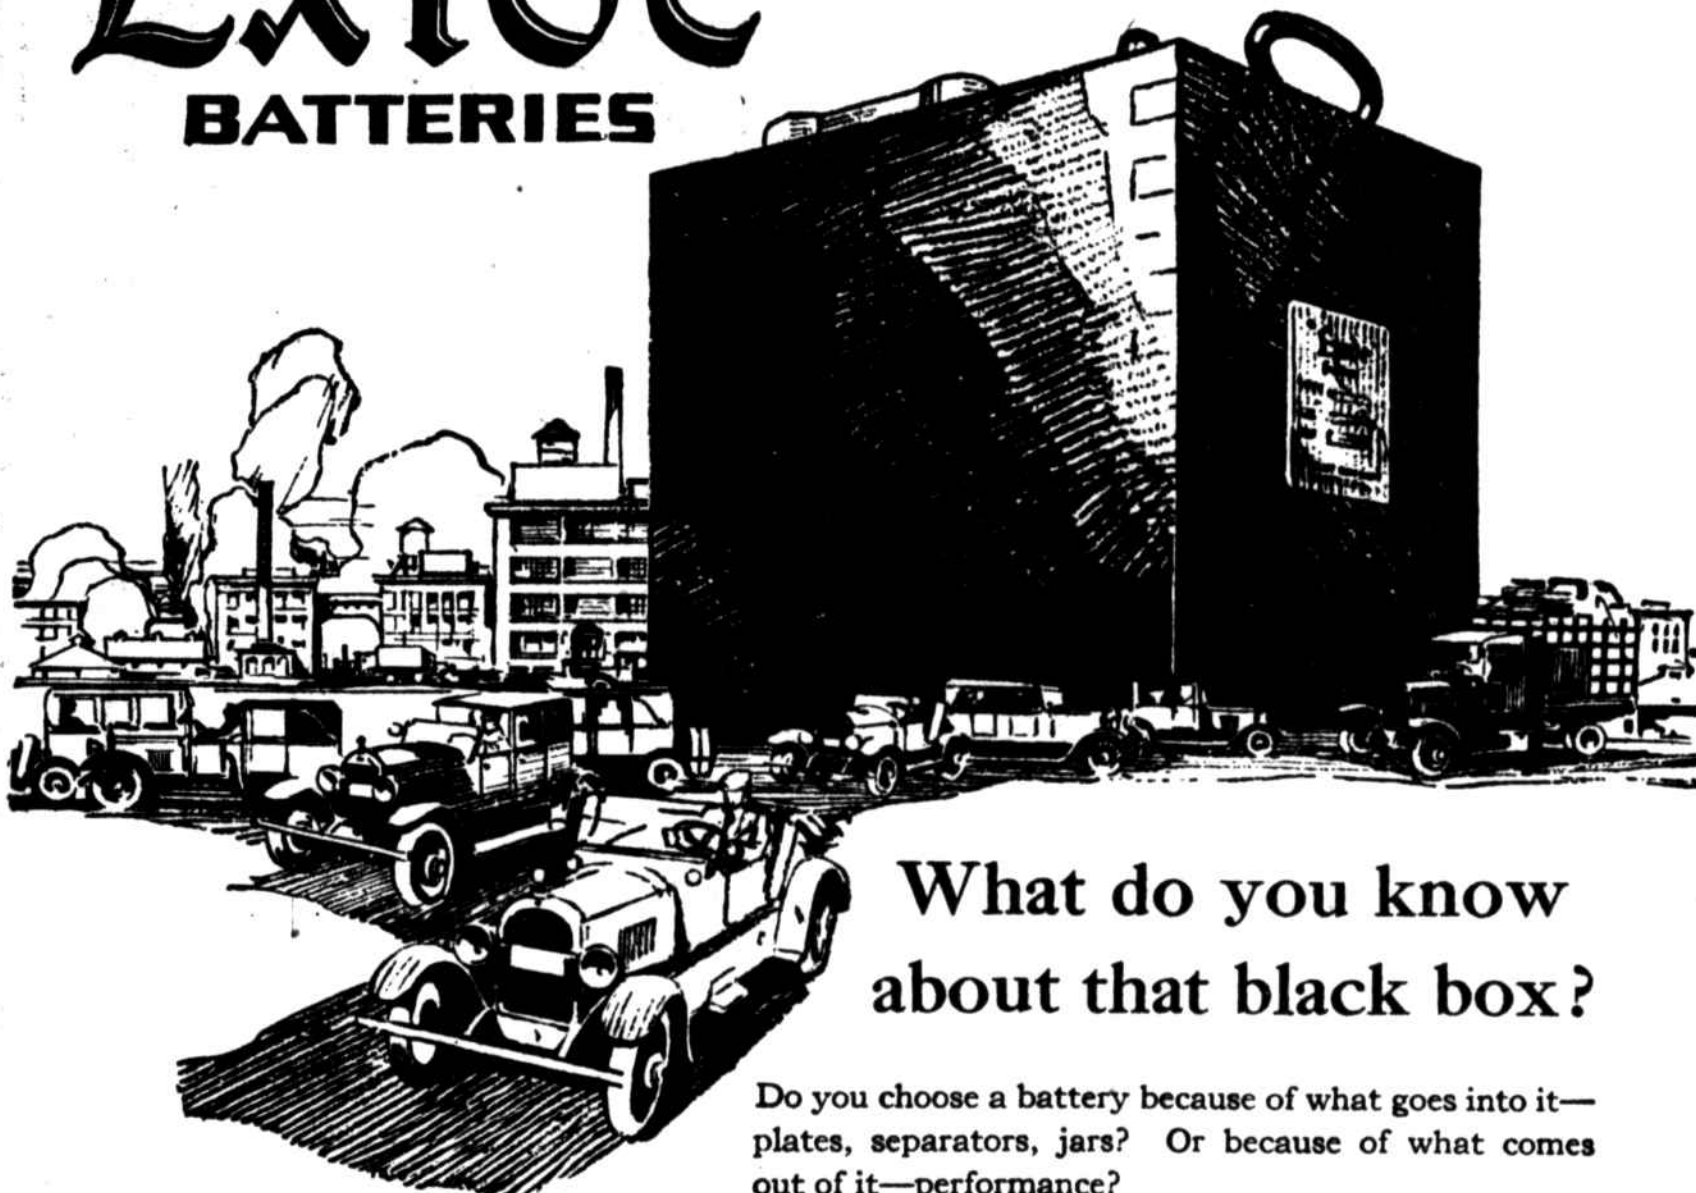

You can take Dr. Caldwell's Syrup Pepsin yourself or give it to a babe in arms, as thousands of mothers do every day, with the confidence that it is the safest and best medicine you can use for constipation and such complaints. A teaspoonful will relieve you over night even if the constipation has been chronic for

years. Dr. Caldwell's Syrup Pepsin is a compound of Egyptian senna and pepsin with pleasant-tasting aromatics, and does not cramp or gripe. Every druggist handles it, and bottles are so generous that the cost amounts to only about a cent a dose. You buy it with the understanding that if it does not do as claimed your money will be refunded. The names of all the ingredients are on the package.

Mrs. A. Arceneaux of Orange, Texas, suffered from constipation for six years and found no relief until she took Dr. Caldwell's Syrup Pepsin; and Mrs. Gus Anderson of Ball, Kans., corrected her bowel trouble so that she now eats and sleeps normally. Bring a bottle of Dr. Caldwell's Syrup Pepsin into your own home and let the family use it for constipation, biliousness, wind, gas, headaches, flatulence, and to break up fevers and colds.

The family laxative

Exide BATTERIES

What do you know about that black box?

Do you choose a battery because of what goes into it—plates, separators, jars? Or because of what comes out of it—performance?

If you are a technical-minded motorist, you will be particularly interested in Exide construction, for every detail is the result of experience that dates back to the birth of the storage battery.

If, on the other hand, you buy on reputation for performance, you will be interested in these facts: Exide was the pioneer automobile battery and is generally recognized as the battery of very long life. During the entire history of storage batteries, the Exide has been the mainstay for business and governmental uses where battery performance must be reliable.

You have a right to expect longer life and more efficient service from an Exide than from an ordinary battery. Exide quality is not a luxury but a dollars-and-cents economy.

THE LONG-LIFE BATTERY FOR YOUR CAR

This Added Charm At your command now—prettier teeth

Nothing you can add to beauty means so much as prettier teeth. Millions now attain them in a new way. Dainty people of some fifty nations employ this method now.

But it means far more than beauty. It means cleaner, safer teeth. Leading dentists everywhere are urging its adoption.

This is to urge you, in fairness to yourself, to see the results of this method.

That dingy film

Your teeth are coated with a viscous film. You can feel it with your tongue. It clings to teeth, gets between the teeth and stays. Most tooth troubles and most dingy teeth are now traced to this film.

Film absorbs stains, making the teeth look cloudy. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea. All these troubles have been constantly increasing, despite all care, because the ordinary tooth paste cannot effectively fight film.

New methods now

Dental science has long been seeking ways to fight that film. Two effective

methods have been found. One acts to curdle film, one to remove it. And this is done gently, day by day, without the use of harmful grit.

Able authorities have amply proved these methods. Now leading dentists, all the world over, are advising their daily use.

A new-type tooth paste has been created, based on modern research. It brings other and new desired effects, and avoids some old mistakes. The name is Pepsodent. In that scientific tooth paste are embodied those two great film combatants.

Old methods wrong

Modern research also shows that tooth pastes based on soap and chalk are wrong. Being alkaline, they reduce the salivary flow. They reduce the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

They reduce the alkalinity of the saliva, which is there to neutralize the acids which cause tooth decay.

Pepsodent corrects those errors. It multiplies the starch digestant, multiplies the alkalinity. Thus every use gives manifold power to Nature's great tooth-protecting forces in the mouth.

You see the results in
more smiles

Look about in any circle. Note how many pretty teeth you see. Note how people show them when they smile. Everywhere you can see the results of this new film combatant.

And those whiter teeth mean cleaner, safer teeth. The teeth's great enemies are effectively combated. It means that your children can better avoid the troubles that you may have suffered.

Send the coupon for a 10-Day Tube. Note how clean your teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

That test will be delightful. Its results will be a revelation to you. It may lead, for you and yours, to life-long benefits. Cut out the coupon now.
